

SHETH LUJ AND SIR MV COLLEGE
Subject: Data Analysis with SAS / SPSS / R

M2 Practical No: 2

Aim: Generating frequency tables using table() or count() (R).

Code:

1. Import Dataset

```
data = read.csv("star_dataset.csv")
```

2. View Dataset Structure (R head(data) equivalent)

```
head(data)
```

3. Frequency table for a column (example: Spectral Class)

```
freq_table <- table(data$"Spectral Class") # Note: using $ with spaces requires quotes in R
```

4. View result

```
freq_table
```

Output:

```
R - R4.5.2 - ~/R
